

Bhavesh Gurav

DOT.NET Full Stack Developer (L2)

☎ 8412024395 ✉ bhavesh.gurav.in@gmail.com  LinkedIn  github  Portfolio

Profile Summary

Full Stack .NET Developer with 3+ years of experience building scalable enterprise applications using .NET Core, MVC, Web APIs, SQL Server, and Angular. Skilled in backend architecture, REST API design, database optimization, and CI/CD workflows. Proven ability to deliver government and commercial products with high performance and reliability. Strong in client communication, agile delivery, and full SDLC participation.

Work Experience

Rysun Labs / KCSIT Global

02/2022 – present | Ahmedabad

Software Developer L2

MagnitudeGold – Full Stack Developer

Client: South Africa | **Tech:** .NET Core, .NET MVC, SQL Server, Angular, Azure DevOps

- Developed and maintained both frontend and backend modules, including database integration and mobile APIs to support 1000+ users and 50+ Companies like Toyota, Beekman, etc on a no-code business platform.
- Resolved over 150+ issues and 450+ internal defects, significantly improving system performance.
- Delivered 50+ new development features and modules tailored to business needs.
- Led the API upgrade project, guiding a team of 5 developers and establishing a new structural standard.
- Received 10+ direct client appreciations for delivering high-quality work on time.

GIPL Government Projects – Software Developer

Client: Govt. of Gujarat | **Tech:** .NET Core, PostgreSQL, Bootstrap, CouchDB, Razor Pages

- Built modules for online registration, license renewal, and smart inspections. Developed PostgreSQL stored procedures to handle large-scale data processing.
- Refactored large stored procedures into smaller, manageable entities to optimize performance and maintainability.
- Built and integrated an email notification module for user registration confirmations.
- Designed dashboards and APIs for citizen services and labor law enforcement.
- Ensured role-based access and real-time analytics in high-traffic modules.

Form Builder – Associate .NET Engineer

Client: Govt. of Maharashtra | **Tech:** .NET MVC, PostgreSQL, Bootstrap

- Developed backend logic and stored procedures for service registration modules.
- Collaborated with the frontend team for dynamic dashboard interfaces.
- Developed role-based authentication and access for multiple user types including labor personnel and contractors.
- Ensured clean code practices, proper documentation, and smooth team collaboration for continuous delivery.
